## **AMBIDEXTROUS TILT CYLINDER AND GUARD**

H-E PARTS INTERNATIONAL MINING SOLUTIONS (H-E PARTS) PROVIDES PARTS AND COMPONENT SOLUTIONS FOR OFF ROAD HEAVY EQUIPMENT AND SPECIALIZES IN THE REDESIGN AND REMANUFACTURE OF MINING AND QUARRY PRODUCTS. OUR SOLUTIONS PROVIDE THE END-USERS WITH EXTENDED LIFE, EASE OF MAINTENANCE, AND SUPERIOR PERFORMANCE.

H-E Parts offers an ambidextrous tilt cylinder and guard for D10T dozers and is working towards expanding the offering to multiple models. The innovative cylinder and guard allow for the conversion from a left or a right-hand cylinder by exchanging the guard plate from one port location to the other. The tilt cylinder can then be installed according to the side of the machine it is required on, the hydraulic lines attached, and the machine is ready to resume operations.

By switching to the ambidextrous cylinder, the customer has the opportunity to reduce stock by half, or the flexibility of using the same component on either side of the machine.

### **BENEFITS**

- Easy installation
- Inventory reduction
- Lower total cost of ownership
- Less downtime on equipment

H-E Parts International replacement parts are compatible with the makes and/or models of the third-party equipment described. H-E Parts International is not an authorized repair facility of these third parties and it does not have an affiliation with any manufacturers of these third-party products. All brands, original equipment manufacturer (OEM) part numbers or references are owned by the respective OEM entities or their affiliates. These terms are used by H-E Parts International for identification and cross reference purposes only and are not intended to indicate affiliation with, or approval by the OEM, of H-E Parts International or its products.
